Özellikleri

Bitki yüksekliği	Very high
Tabla duruşu	Flat
Tabla pozisyonu	Slightly inclined
1000 Dane Ağırlığı	45 - 50 g
Yağ içeriği	44 - 45 % %
Oleik Asit Oranı	%

Bilimsel tarım

Sürme Gücü
Yatmaya Dayanıklılık
Kuraklığa Dayanıklılık
Orobanş

Hastalığa dayanıklılık

Mildiyö	RM9
Phomopsis	8
Sclerotinia (tabla)	
Sclerotinia (gövde)	9

Kültür öneriler

	Sulanabilir	Stresli Koşullar
Adaptasyon	3	4
Ekim Sıklığı (bitki/dekar)	5500	6500

MAS 880SU is a new hybrid combining an ORO-G tolerance and TBMT tolerance. Because of its maturity group, avoid to use this hybrid in light soil with low water stock and late sowing. Below 3T/ha this hybrid can easily compete in the market. He is the perfect choice for farmers who want to grow winter cereals and use TBMT technology under ORO G pressure.
